

REMOTE HEADERS

CUSTOM BUILT FOR MAXIMUM PERFORMANCE

Designed For and Built in North America

WHY CHOOSE A REMOTE HEADER?

Trenton's Remote Headers are custom built to suit your new or existing equipment. The "Tree" provides easy access for installation and servicing, and allows existing branched circuits to be upgraded.

The isolated header allows for a large reduction in discharge line gas pulsations that lead to leaks. Smaller pipe diameter runs throughout the facility simplify the installation process.

OPTIONS

- Remote Circuit Panel for Control of Defrost
- Mounted Vertical or Horizontal Receiver
- Filter/Drier/Sight Glass
- CPC, Microthermo, Danfoss, PLCs and other controllers supported
- Multiple Suction Groups for Dual Temp Applications
- Heat Exchanger for Vapour Injected Compressors
- Insulated Liquid Lines for Sub Cooling Applications
- Mounted Leak Detector
- Flexible Mounting for Space Limited Applications

FEATURES

- Painted Frame
- Large Suction Header Provides Minimal Pressure Drop for Maximum Efficiency and Acts Like an Accumulator
- Insulated Suction Lines to Reduce Capacity Losses
- Easy Access for Installation and Servicing
- Isolation Valves to Make Servicing Quick and Easy
- Mechanical or Electrical Controls
- Compatible with Most Low GWP Refrigerants

WE HAVE A FULL LINE OF CUSTOM REFRIGERATION SOLUTIONS.

From flexible, multi-compressor systems to parallel racks, we have the experience and technologies to deliver a fully customized solution for your application.
