Features

- Narrow-width condenser design to suit shipment in containers
- THERMOSPAN™ coil design feature eliminates tube failure on tube sheets
- Variable Speed EC Motors with male electrical plug moisture slinger and rainshield for complete weather protection
- Rugged heavy-gauge galvanized steel rail motor mounts/support
- All fan sections are individually baffled with full-height partitions and clean-out panels
- Heavy-gauge galvanized steel cabinet construction assembled with zinc-plated huck bolts supported on heavy-duty legs
- Terminal block
- Single-entering electrical service
- Control circuit voltage – 230 V
- Control circuit transformer where applicable
- EC motors on all fan sections
- Cloudburst™ Adiabatic Cooling System available

Applications

- For use with CO₂ Parallel Racks
- Supermarket
- Warehouse
- Data Centers

Electrical

- 208-230/3/60
- 460/3/60
- 575/3/60

Certification

Brantford, Ontario – Longview, Texas
